<u>In week</u> - Started working on using the Maze wheel, getting a visual representation and moving around as the player. - Learning the Pygame basics <u>Next week</u> - Start working on collisions, tile based movement	<u>In week</u> - Players can be added to Highscore and auto limits to ten sorting them in descending order which can save python style comments (Later fixed by jsmidt to include in line comments) - Started working on Buttons and created the initial TextButton and ImageButton - Started working on the main menu <u>Next week</u>

	• Finish the main menu
Date: <u>Monday</u> 2026/08/03	
jsmidt	dijonker
<u>In week</u> • Switched from free movement to tile based movement for player input. Seemed to be easier at the time • Working on collisions • Implemented Divan's Pacman image	<u>In week</u> • Working on the pause menu • Read up on pygame.events
Date: <u>Friday</u> 2026/08/07	
jsmidt	dijonker
<u>In week</u> • Started on Gums and Scoring classes • Pac-gums now show up on maze • A score is being kept, started on score bar <u>Next week</u> • Polish the score bar, add lives mechanic Adding super Pac gums	<u>In week</u> • Finished the main menu hooking it up to the Engine class • Worked on user input and moved key input to for-loop with the rest of events • Finished pause • Started working on the Ghost class <u>Next week</u> • Ghost class
Date: <u>Monday</u> 2026/08/10	
jsmidt	dijonker
<u>In week</u> • Added a count-down, timer and the level in scorebar • Polishing gums	<u>In week</u> • Ghost movement and Ghost class
Date: <u>Friday</u> 2026/08/14	
jsmidt	dijonker
<u>In week</u> • Starting on Game-Over screen as well as a victory one • Created a new separate class for keeping track of all the timers necessary. • Added bonus graphics for level 10 • Refactoring a lot of code, using more global variables to keep everything concise and easily customizable <u>Next week</u>	<u>In week</u> • Linked up the Settings button to an actual menu • Settings changed the values the Engine class is initialised with and saves changes • Ghost movement was solved and they can not pass through walls and chase pacman accordingly • Introduced the targeting system which selects a tile around pacman for certain ghost to track

Working on death mechanics.	- Implemented ghost fleeing, hitboxes and chasing <u>Next week</u> - Work on the targeting system
Date: <u>Monday</u> 2026/08/17	
jsmidt	dijonker
<u>In week</u> - Implemented Pac-Man death animation - Ghosts now reset to place	<u>In week</u> - Fixed bugs related to ghost movement when following pacman - Work on targeting - Highscores
Date: <u>Friday</u> 2026/08/21	
jsmidt	dijonker
<u>In week</u> - Changed movement back to free movement instead of tile based for more interactive gameplay - Created a separate Player class to handle Inputs, visual rep. - Major Engine overhaul, even more cleaning done. - Cleaning up debugs messages <u>Next week</u> - Working on linting, getting distributable to work	<u>In week</u> - Finished targeting so ghosts can now target a point around pacman based on their colour. Certain ghosts will target Pacman if in a few tiles distance. - Finished the highscores menu - Polished the Settings menu and made ToggleButton for cheats - Added timers for the different state of ghost - Added scatter mechanics for ghosts <u>Next week</u> - Cleanup and Documentation
Date: <u>Monday</u> 2026/08/24	
jsmidt	dijonker
<u>In week</u> - Started on the Distributable - Slight README work	<u>In week</u> Clean up and documentation
Date: <u>Friday</u> 2026/08/28 - End of project	
jsmidt	dijonker
<u>In week</u> - Finished distribution - Working on documentation	<u>In week</u> Finished
